- Electrical ductbank work could begin late next week at the intersection of King and Market Streets proceeding down the west side of King Street. Parking meters will be bagged, and there will be one lane of traffic open in that area. Signage will be placed near King and Beaufain Streets to alert drivers to the traffic control plan.

- Good progress is being made at Horlbeck Alley as electrical conduit and the new water main is being installed. Streetscape staff will contact merchants who park in the private lots in those areas when different parking arrangements are necessary. Signage for this project is in place along King, Broad and Meeting Streets.

- The sewer line repair at 155 King Street near Jacob's Alley will be completed this week and the point repair between 151 & 153 King Street will be completed early next week.

- Also next week, sewer point repairs will potentially occur at the Horlbeck Alley intersection, just south of RTW Charleston and in front of the Library Society.

- Videotaping and still photographing of work areas before, during and after completion of individual projects is an ongoing process. Site cleanliness and orderliness continues to be a priority. The "Pardon our Progress-Lower King is Open for Business" signs will be placed next week.

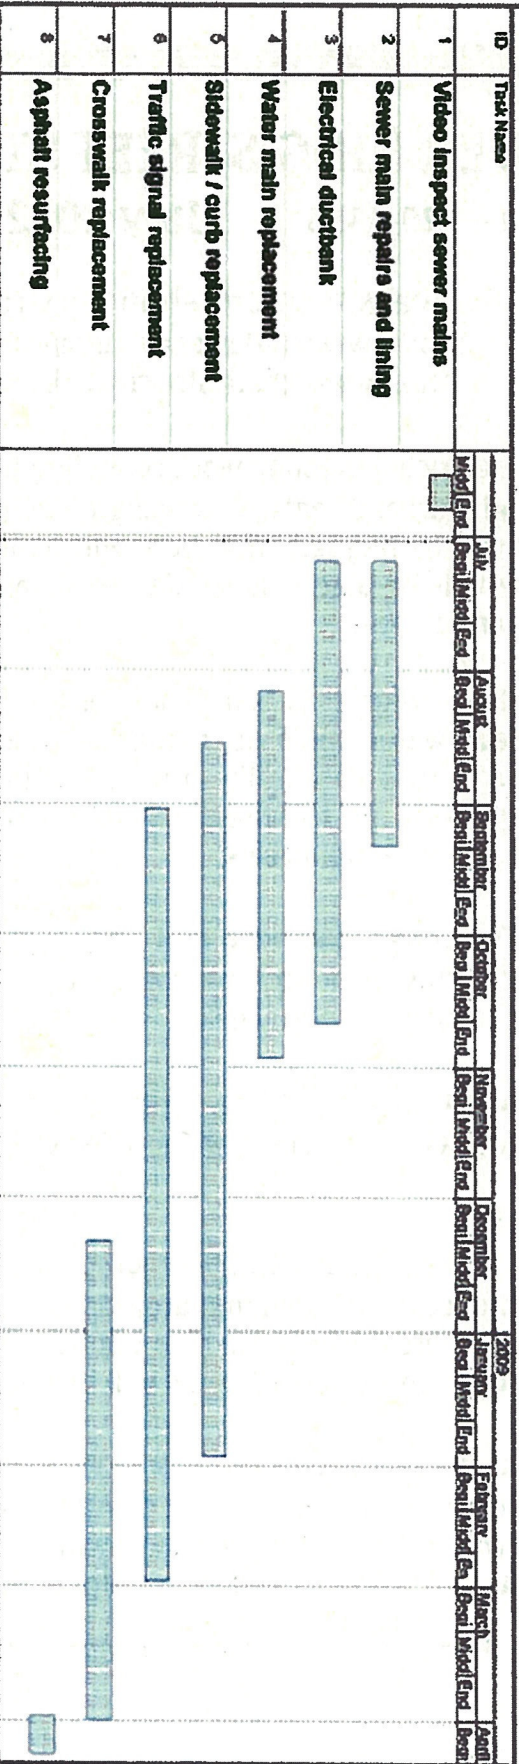

- As the sewer work progresses to reline the mains and lateral services to the buildings, it is probable that disruptions in water service for limited periods of time will occur. Streetscape staff will be in communication with merchants, residents and property owners in order to plan for this.

Most people are in favor of progress. It is the changes they don't like.
